Super Simple Learning materials are created by experienced educators to meet the needs of young learners and those who teach them. When you listen to our award-winning kids' songs, you'll hear right away how fun and easy they are to teach through gestures and dance. When you interact with any of our videos or apps, you'll see how quickly children react to them with bright eyes and big smiles. When you look through our ABC books, you'll notice how they are intuitively designed for the small fingers, limited vocabularies, developing motor skills, and short attention spans of very young learners.

It all started in the classroom for us and our goal is the same today as it was then: create quality educational materials that make learning and teaching simple and fun!
